DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4,8,16,17,19 &20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rainville et al. (US 5,768,897) in view of Hill et al (US 2003/0164091). Rainville discloses an air drying apparatus and comprising: a first desiccant (124), a second desiccant (144) consisting silica gel and activated alumina, a dew/humidity sensor (420) and a port discharge (164). The disclosed invention maybe use to dehumidify a refrigeration or another unit since it wasn't positively claimed within preamble of claim. Rainville disclosed invention lacks a replaceable desiccant. Hill teaches a replaceable desiccant cartridge. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the disclosed invention of Rainville to include a replaceable desiccant cartridge as taught by hill for continuous drying of air within system.

Allowable Subject Matter

Claims 5-7,9-15 & 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
